Concepts: TDD, BDD, DDD, OOP, MVC, PWA, CI/CD, cloud, microservices, IaC, SaaS, PaaS, on-premise, routing, switching, multihoming, vlan
Industries: customer service, loss prevention, material handling, virtual value chain, web, warehousing logistics, NEMT, telecommunications
Languages: js, python, java, c#, c++
Protocols: Rest, SOAP, TCP/UDP, ipv6, ipv4, DNS, HTTP/2
Systems: Azure, AWS, GitHub, Jira, Aha!, SAP, Salesforce, Monday, Confluence, Notion, Figma, Linux, Windows, MacOS
Tools: rabbitmq, SQL, postgres, codeQL, jmeter, cypress, postman, newman, k6, burp, zap, selenium, appium, moq, xunit, libpcap, git, intellij, vscode, vim

---

Aries Defense, LLC | Software Engineer | Jan 2024 - Mar 2024
- configured Rally Tactical Services on an Embedded Linux system that translates between G.711 Companding Algorithms
- updated an existing Aries software product that provides a graphic interface for HUD configurations
- worked on an Android application using Java that acted as an App store for other Aries Software Products
- updated internal documentation for installing the ATAK SDK

SVT Robotics | Lead Quality and Release Manager | Aug 2021 - Sep 2023
- developed an automated component testing pipeline using Cypress, Docker, Azure, and bash
- maintained soc2 compliance using codeQL, ZAP, and burp suites
- automated over 900 scenarios using a simulation service written in c# and rabbitmq
- planned 200 releases between three agile product teams
- managed and reported code churn, time to release, and release failures for c-level leadership
- conducted regular retros, backlog grooming sessions, and compliance risk assessment reviews

UZURV Holdings, LLC | Senior Test Automation Engineer | May 2019 - Aug 2021
- designed a test automation framework using java, selenium, cucumber, and appium
- developed user-generation test scripts using plain javascript and postgres
- collaborated with frontend team to maintain test-ids in the angular and ionic frontends
- implemented 400 test scenarios using the test automation framework
- tracked all testing activities using TestRail including WCAG 2.0 compliance
- conducted all test review and automation prioritization meetings

Swisslog Logistics, INC | Lead System Integration Engineer | Jun 2016 - May 2019
- worked in a team tasked with integrating retrieval systems in warehouses
- led go-live events for one of the largest tire distribution projects in America
- planned and conducted F.A.T. events for 8 warehousing projects
- collaborated with project management to track test coverage, test execution, and test cycle times in polarion alm
- tier2 support for any software related issues for sites in North America
- wrote unit, integration, and system tests using java, mockito, and xunit
- implemented a program that automated workflows using selenium and java

Connexion Technologies | Lead System Implementation Specialist | May 2006 - Dec 2012
- helped build an interoperability data center at the main office
- maintained 20 production sites in the Atlanta Metro area
- tier 2 support for all production sites
- commissioned 57 last-mile projects delivering video, voice, and data services to 10K customers
- received a ccna and network+ certification

J. Sargeant Reynolds Community College | Associate of Science in Computer Science | 2013-2016
